

FlexSander 60 is an industrial brush sanding machine developed by Flex Trim and is a powerful alternative to existing hand sanders.

It is useful for sanding of both flat items and items with profiles and edges of 5-10 mm radius.

The speed is fixed at ~600 RPM, which is optimal for sanding with Flex Trim sanding brushes both for getting optimal sanding results and long lifetime of the brushes.

The machine is mounted with a dust hood that can be attached to any kind of vacuum system.

FlexSander 60 is very easy to use and is without vibrations, which means that the operator will get no problems with aching arms, shoulders and wrists.

FlexSander 60 can be mounted with different types of sanding heads:

Disc heads: Ø125 and Ø180

Traditional head: Ø100 - length 100mm.

Technical specifications:	
Motor	1 x 0,33 kW
RPM	600 Rpm
Dust extraction	
Disc head	1 x Ø 50 mm
Traditional head	1 x Ø 40 mm
Weight	
Disc head	2,5 kg
Traditional head	3,5 kg
