GRANUDAN PRODUCT CHART

YOUR SUPPLIER OF SMIRDEX ABRASIVES

INDEX

01. 510 White Line Velour

Smirdex 510 White Dry Sanding series is a universal series of value-for-money products. It is suitable for the **car body** repair and **marine** industry, in order to sand primers, putties and varnishes.

02. 740 Ceramic Line Velour

Smirdex 740 Ceramic Paper Line offers cutting products with improved performance that last significantly longer than the conventional abrasives, since a water-based stearate coating provides maximum load resistance, thus extending the life of the product. It is very suitable for the **marble industry**.

03. 750 Ceramic Net Velour

Smirdex 750 Ceramic Net is ideal for harder and more demanding applications, such as on **epoxy, metal, hard wood** and other solid surface materials..

04. Backing Pads

05. Pad Savers

06. Sanders

07. Various Abrasive

About us

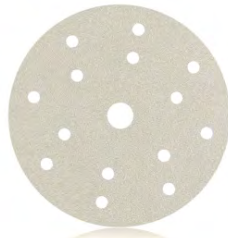

01. 510 WHITE LINE VELOUR

Considering the finer grits of the line, they are highly recommended for the furniture industry. Furthermore, they can be used for sanding wallboards and plasters in building constructions.

The open structure of the abrasive grain and the stearate top-coating enhance durability, preventing clogging and loading.

Various grain sizes

DISCS

510 White Line Velour Discs
Ø150mm/Ø225mm
15 holes

ROLLS

510 White Line Velour Rolls
115mmx25m/50mm

STRIPS

510 White Line Velour Strips
70x400mm
14 holes

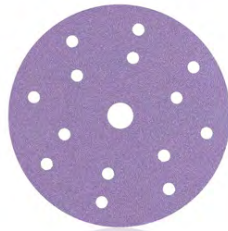

02. 740 CERAMIC LINE VELOUR

The Ceramic grains of this line provide long-lasting sharp edges, offering better finishing results on the treated surfaces. 740 Ceramic Line is perfect for sanding any type of material, such as scratch resistant varnishes and e-coats, primers and composites, eliminating the need for specialty products.

Applying increased working pressure becomes easier for the user, when sanding with 740 series, thus providing high removal rates. Moreover, the hole pattern contributes to a dust-free environment, protecting the worker from the dangerous sanding dust particles

Various grain sizes

DISCS

**740 Ceramic Line Velour
Discs Ø77mm/Ø125mm/
Ø150mm**
15 holes./ 17 holes

ROLLS

**740 Ceramic Line Velour
Rolls 115mmx25m**

STRIPS

**740 Ceramic Line Velour
Strips 70x400mm**
14 holes

03. 750 CERAMIC NET VELOUR

750-series offers an excellent performance and lifespan on primer sanding.

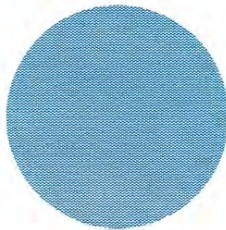

Dust-free sanding:

Thanks to its net fabric structure the 750 Ceramic Net Velour discs achieve maximum particle absorption, for a much cleaner and healthier working environment.

Maximum product lifespan:

The net structure prevents fast clogging compared to conventional paper discs, thus prolonging the product's lifespan.

Various grain sizes

DISCS

750 Ceramic Net Velour Discs Ø150mm/Ø180mm/
Ø225mm/Ø406mm

ROLLS

STRIPS

750 Ceramic Net Velour Strips 70x400mm

04. BACKING PADS

**944 PU POLISHING
125 BACKING PAD**

The 944 PU Polishing 125 Backing Pad has been designed especially for polishing sanding with angle orbital handheld sanders at 125mm, adding smoothness to the final result.

**960 UNIVERSAL
BACKING PADS**

The 960 Universal Backing Pad series offers the options of 125mm & 150mm with several holes' variations and hard or medium hardness. A reliable choice for any kind of sanding work.

**960 BACKING PAD
(750 NET DISCS
D150MM)**

The 960 [Backing Pad 750-companion] is a special backing pad at 150mm of medium hardness, and it is applicable for use with the 750 net discs, for maximum dust extraction effects.

**960 BACKING PAD
(750 NET DISCS
D150MM)**

The 960 Professional Backing Pads, with an efficiently designed airflow channel for improved dust extraction and decreased dust accumulation on the disc, offer a wide range of compatibility with versions of 150mm multi-hole discs.

05. PAD SAVERS

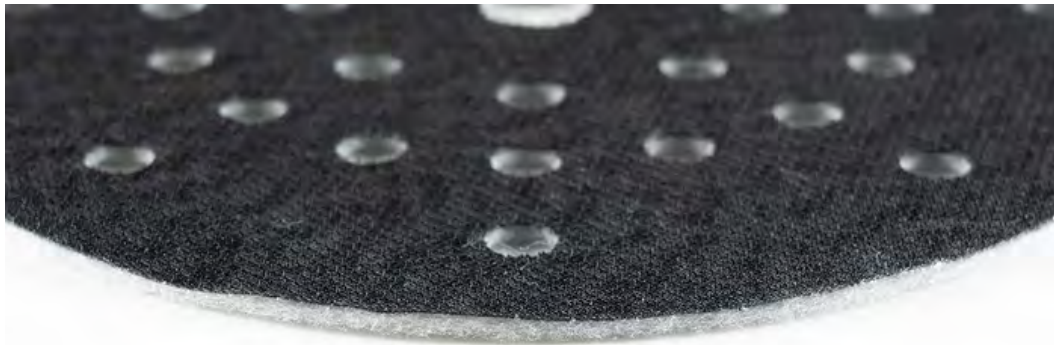

948 PAD SAVER

Innovatively designed to protect the backing pad and increase its lifespan, while providing maximum dust extraction. It is ideal for use with 750 Net Discs and 510 Velour discs.

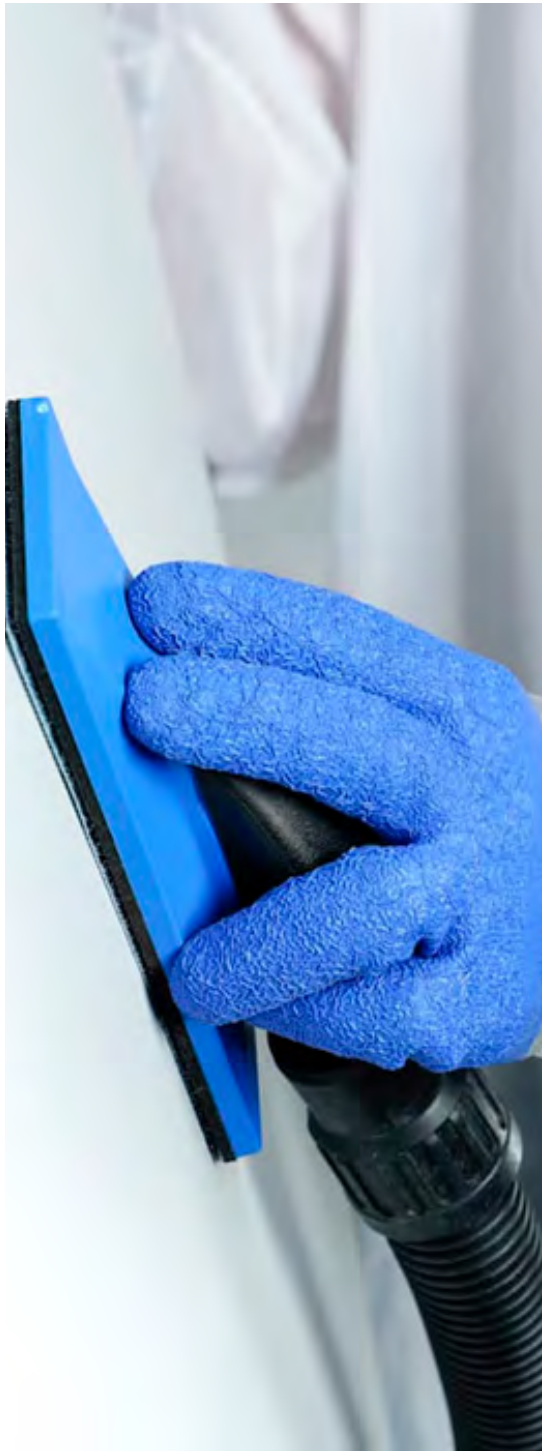

950 PAD SAVER

Designed to protect the backing pad and increase its lifespan, the 950 Pad Saver is applicable for use with the 750 Net Discs, providing also maximum dust extraction effects. 2mm, 5mm and 10mm thickness.

06. SANDERS

965 PNEUMATIC RANDOM ORBITAL SANDERS

The new series of sanders by Smirdex has been specially designed for professionals as it combines all those elements that contribute to high quality precision sanding.

966 DUST EXTRACTION HAND SANDERS FOR VELOUR STRIPS

A handy multitool for sanding and dust extraction, designed in a variety of dimensions for usage in the **automotive** and **marine** industry. The velour backing forms a reliable sanding surface for better results and accuracy of details.

966 METALLIC HAND SANDERS FOR VELOUR STRIPS

A practically designed hand sander, with a durable metallic body and an innovative velour sanding surface, adding precision and consistency to the sanding result

07. VARIOUS ABRASIVE

VARIOUS GRAIN SIZES

135SP ABRASOFT

Perforated/Non perforated
Sponge Rolls 115mmx25m

The foam backing is suitable for **hand sanding of corners, angles of plastic car body parts** and all **difficult shapes** of furniture.

The foam allows pressure to be applied evenly, thus reducing the risk of sanding through the surface.

270 WATERPROOF VELOUR DISCS

The discs are especially designed for wet finishing on varnished surfaces in **automotive** and **marine** market. Due to their finest grit sizes up to P5000, combined with appropriate interface pads are suitable for precision wet micro-finishing on lights, electronics and jewellery applications.

635 ZX ZIRCONIA BELTS

Is suitable for sanding **hard wood, flooring** and **especially metal**. The very strong cotton cloth backing provides excellent durability and the close coating of the Zirconia Alumina grains performs excellently in metal surfaces grinding.

Various dimensions

915 100% ZIRCONIA FLAP DISCS

Are applicable in **metal** and **INOX sanding**. Manufactured with fibreglass pads, with attached flaps of high-quality abrasive cloth, this line is suitable for weldings smoothing, surface flattening and edge rounding, with outstanding sanding output and higher cutting rates.

ABOUT US

Granudan is the exclusive supplier of innovative products and equipment for high advanced composites and various types of ordinary plastic moldings. We are a technical partner who designates the best suitable products with a practical approach.

Granudan sells a wide range of smirdex products. The abrasives is created in high-tech and top-quality abrasive materials and relative accessories, meeting the evolving and demanding needs of a vast variety of professionals.

Constant investment is made in research and development to ensure that the products are always one step ahead of the competition.
